

Magnum

Machine Features

- Large caliber pipe cutting up to 42'
- Supports up to 60" material
- Solid steel constructed frame
- Precision linear rails ensure extreme accuracy over long distances
- Anti-backlash air assisted transmissions ensure precision and accuracy with the helical rack and pinion X/Y axis
- High precision ball screw Z axis
- Planetary gearbox rotational drive
- Precision laser aligned heavy duty steel support rollers
- Protective bellows & enclosed cable carriers

Machine Options

- Manual/automated 4 & 5 axis bevel cutting
- Non-Rotational hole cutting
- Fume Extraction systems available
